

Seth Place Water Main Construction Planned

Project Description: The City of Rockville's water main contractor, *Sagres Construction Corporation*, will install over 1,000-feet of new water main along Seth Place. Construction will begin in July and is expected to continue for one month, weather permitting. Utilities (water, sewer, storm drain, and gas lines) along this street and within the right-of-way will be marked with spray paint. Construction crews will begin by test pitting and cutting the pavement using a saw, before installing the new water main.

Traffic along these streets may experience delays. Impacts during construction include temporary lane closures, on-street parking restrictions, construction noise, and temporary water service interruptions. "No parking" signs will be posted 48 hours in advance and may be in place for two weeks at a time. Access to driveways will be maintained throughout the construction period. On-street parking will be restricted periodically. Temporary lane closures and parking restrictions will occur on weekdays, generally between 6:30 a.m. and 6:30 p.m.

Purpose: As part of Rockville's Water Main Rehabilitation program, the Department of Public Works will replace mains (pipes) in our water system, which assures continued dependable, efficient water service. The improvements are designed to maintain water pressure in homes and businesses, as well as essential fire protection. This program meets the Mayor and Council's goal of a sustainable infrastructure. The program prioritizes water mains for replacement based on pipe condition, water quality, water main break history, and fire flows.

Location: Seth Place between Park Road and Charles Street.

Timeline: Construction will begin in July and is expected to continue for one month, weather permitting.

Cost: \$250,000 (estimated).
