POLICE CRIME REPORT

ONE PILL CAN KILL: BE AWARE OF COUNTERFEIT PRESCRIPTION PILLS

This International Overdose Awareness Day and [National Recovery Month](#), did you know that counterfeit pills are a growing source of death in the United States?

These drugs have exploded in prevalence: **in 2021, the DEA seized more fake pills laced with fentanyl than the previous 2 years put together.**

DEA lab testing has also revealed that **4 out of every 10 pills with Fentanyl contain a potentially lethal dose.** Criminal drug networks mass-produce counterfeit pills to look like prescription drugs like Oxycontin, Percocet, Vicodin, Xanax, and Adderall.

These fake pills are widely available on social media and have been identified in all 50 states and DC.
